

Nursing Intranet User Survey

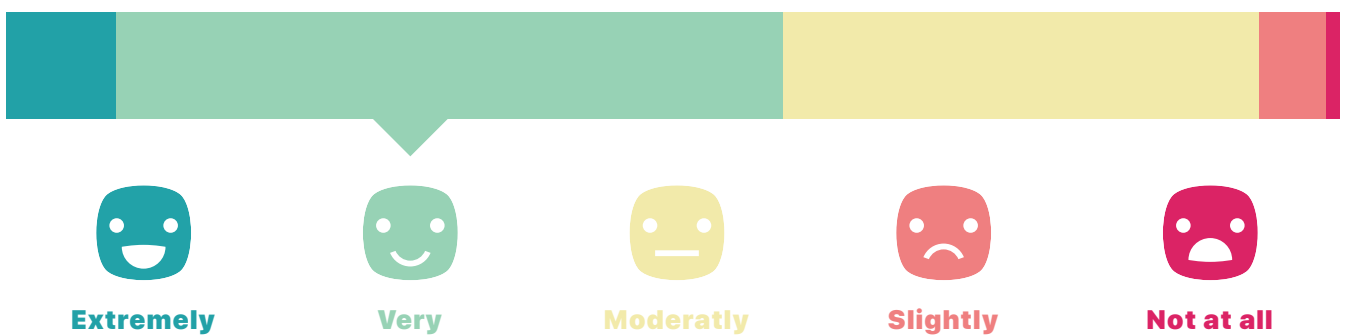

1 In terms of organization/structure, how easy was it to find the topic or information you were looking for?

// When looking for specific education topic for patient or for RN it can sometimes take a few links before you get to the site you need. It needs to be more streamlined."

// The search feature on all of the Hopkins websites is horrible! I get better results using google!"

2 How up-to-date/relevant was the information you needed?

3 Do you think the information contained on the nursing intranet provided you with new knowledge and/or helped you to improve your practice?

Yes

No

// Yes and no. Policies are readily available which is great, but if I want more info on a topic from Cinahl or PubMed, it's difficult to find on this website."

// Nursing news would be nice to see on the front page."

4 How do you use the nursing intranet?

As a directory

As a resource library

To find out more about employee benefits or HR information

For news and information about nursing at Johns Hopkins

Other

5 What improvements or additions to the nursing intranet would you benefit from?

// A good Search Engine to find clinical facts, policies or procedures. Current search engine does a poor job in providing results to my searches. it takes too long and the longer it takes to search for policies, the safety of the workplace equally declines."

// More comprehensive search tags for pages maybe?"

// Policies are hard to find especially in an emergent situation."

// Add a search feature that takes me directly to the page/info that I want."

// Links, better search engine, more organization for bedside staff members to access just in time education."
